

Job-Title

About Us

Rulemapping Solutions, based in Berlin, stands for innovation at the intersection of law and technology. Our mission: to simplify, accelerate, and make complex bureaucratic processes transparent for everyone. With our unique Rulemapping method and Rule-Based AI, we develop solutions that relieve companies of bureaucratic burdens, make access to justice easier for individuals, and reimagine public administration. Supported by the Federal Agency for Disruptive Innovation SPRIND, we are shaping the standard for the digitalization and automation of rule-based decision-making processes.

Together with you, we want to drive this vision forward and revolutionize the world of rules and laws! Rulemapping Solutions GmbH is a subsidiary of the Rulemapping Group.

Your Tasks

- Thought leadership in the field of AI and Large Language Models (LLMs).
- Support all teams in the development, optimization, and operation of our LLM-powered solutions.
- Analyze trends and the LLM/AI product and services market to translate technological innovations into the Rulemapping Platform.
- Select and take ownership of LLM providers, including result optimization and efficiency improvements.
- Assist with integrating LLM technologies into client projects and our platform.
- Monitor and analyze platform data and LLM decisions in live environments.
- Develop and implement data management and machine learning pipelines, including Retrieval-Augmented Generation (RAG) and Explainable AI.
- Ensure compliance with regulations (AI Act, GDPR, ISMS) in collaboration with data protection and security officers.

Your Profile

- Proactive and self-driven problem solver.
- Team player with strong communication skills.
- Deep, hands-on expertise in AI and LLMs.
- Experience with ML frameworks (e.g., PyTorch, oLLaMa, VLLM) and modern DevOps processes.
- Basic understanding of logic, retrieval pipelines (RAG), and Explainable AI.
- Knowledge of security aspects of machine learning and best practices for secure AI systems.
- Proficient in programming languages such as Python, Java, JavaScript, and relevant cloud technologies (Azure, AWS, GCP).
- Experience with databases (PostgreSQL) and data science/data engineering tools.

- Practical experience in SaaS or legal tech environments, as well as agile development methodologies (Scrum, Kanban).
- Nice to have: contributions to open-source projects, personal tech projects, or knowledge of German law.

What We Offer

- A key and responsible role in a growing GovTech company.
- Flexible working models and a modern corporate culture.
- Central office location in Berlin-Mitte.
- Innovative projects and career development opportunities.
- A dynamic team with lots of creative freedom for your own ideas.
- An attractive salary package.

Are you ready to become part of an innovative team and help shape the future? Don't wait – apply now! Send your application documents to jobs@rulemapping.com.

We look forward to meeting you and achieving great things together!
